Education

BIT, Sindri

Aug 2019 – June 2023

Bachelor of Technology in Electrical Engineering

CGPA: 8.69

Technical Skills

Languages **C, C++, Python, JavaScript, TypeScript, Java**

Frameworks: **React.js, Next.js, Node.js, NestJS, FastApi**

Databases: **PostgreSQL, MySQL, MongoDB, Redis**

Tools: **Openai Agent Sdk, RAG, Kafka, RabbitMQ, AWS, Azure, Docker**

Experience

Frinks.ai

March 2026 – Present

Software Engineer II (SDE 2)

- Refactored legacy Node.js/Express codebase into a modular architecture, improving maintainability.
- Built real-time pipelines using **RabbitMQ** and Modbus TCP to process **10K+ inspection events/hour**.
- Designed a stateful system to aggregate inspection events and trigger PLC-based pass/fail actions.
- Built an **agentic AI workflow** to automate daily production summaries and reporting using OpenAi Agent sdk.

Globallogic – A Hitachi Group Company

Sep 2023 – March 2026

Senior Software Engineer

- Built scalable backend services using **NestJS** and **MSSQL**, deployed on **Azure** with **Docker**.
- Optimized high-traffic APIs by replacing ORM queries with raw SQL, reducing latency by **90%**.
- Improved query performance by **45%** using indexing, window functions, and query optimizations.
- Designed event-driven pipelines using **Kafka**, caching, and pre-aggregation to reduce DB load.
- Built a **RAG-based chatbot** using **FastAPI** and React with **LLaMA 2**, enabling document-based query answering.
- Implemented **cron-based aggregation pipelines** to precompute analytics and improve dashboard performance.
- Collaborated across teams to deliver scalable features end-to-end, ensuring production reliability and smooth releases.
- Wrote Unit test cases using **jest** and **mocha** for apis and react components with more than 95% code coverage.

The Expert Web Agency

Dec 2022 – Aug 2023

Software Engineer Trainee

- Built a production SaaS platform using **NestJS** and **React.js**, supporting **1K+ monthly active users**.
- Implemented **JWT-based authentication**, securing **30+ APIs** and reducing unauthorized access incidents by **60%**.
- Designed scalable data models using **PostgreSQL**, optimizing queries to achieve **35% faster API response times**.

Projects

AI Workflow Orchestration Platform

2025

NestJS, TypeScript, MySQL, OpenAI Agents SDK, Claude, React.js, Redux

- Built a **multi-agent LLM orchestration platform** with a Node.js execution engine supporting **agent handoffs**, branching, and parallel workflows.
- Developed a **React + Redux** drag-and-drop workflow builder for no-code AI automation.
- Used **OpenAI Agents SDK** and **Claude** via a provider-agnostic LLM layer with real-time **SSE streaming** for execution visibility.
- Designed a **tooling layer** with external APIs, vector search (RAG), and custom tools for agent-driven actions.
- Implemented **execution tracking, token usage monitoring, and cost analytics** for LLM workflows.

Achievements

- **Codeforces Expert** (rated **1600+**); ranked in top 2% (**Rank 322**) at **ICPC Amritapuri Regional 2020**.
- **Won 1st place** in AutoSparx-2020, a national automotive hackathon by **SAE India & ARAI Academy**.
- Received **Spotlight of the Month** award 3 times at GlobalLogic for consistently outstanding performance.
